

Topic Health Sciences

Quality, workforce, and the people – How to improve health care systems

Workshops on 3 days with
Prof. Dr. Tim Doran, Dr. Anneke van Vught,
and Prof. Dr. Jan de Maeseneer

Day 2: Team based health care models – barriers and facilitators
Dr. Anneke van Vught

Tutors:	Anneke van Vught , epidemiologist, is senior research fellow in the Organisation of Care at the HAN University of Applied Science in Nijmegen, Netherlands. She is working on projects related to skill mix and professional role revision, for instance, in primary care, rehabilitation medicine, elderly care, mental health care and hospital care.
Date/Rooms:	Day 2: Wednesday, 21 October 2015, 10:00 - 12:00, 13:00 - 15:00 Room 4.B56 Frohburgstrasse 3, 6005 Luzern
Language	English
Contact:	Organizer: stefan.essig@iham-cc.ch
Registration:	Deadline for registration: October 14, 2015 Maximum number of participants: 12 Registration for single days is possible, however, those registering for all 3 days are preferred Please register by email to colette.lenherr@unilu.ch
Content:	Day 2: Team based health care models – barriers and facilitators (Dr. Anneke van Vught) After an introduction on the developments in the Dutch organization of health care (e.g. substitution of care from doctors to nurse practitioners and physician assistants), attendees are challenged to discuss with each other about the workforce in Swiss medical care. Attendees will discuss about different models of role revision and associated challenges or obstacles.
Prerequisites	There are no requirements for attending the workshop. A general interest in health services research is assumed. There is no preparatory material to the workshop.
Materials	
Credits	0.5 ECTS per day
Notes:	This course is for PhD students, post-docs and faculty members in epidemiology, health and political sciences.

This workshop is part of a 3 days' workshop. For more information please see:
