

Applied Bayesian Statistics in Medical Research

Description

The Bayesian approach to medical research offers a powerful framework allowing for the incorporation of externally available information. Although Bayesian statistics is sometimes perceived and discussed as controversial, this course is not about controversies, but about pragmatic ways of integrating available information in a coherent way in analyses of epidemiological and clinical studies. The course builds on applied problems and exercises. It is aimed at epidemiologists, statisticians and others who wish to use Bayesian approaches. Participants should have a good understanding of basic statistical and epidemiological principles and be able to interpret parameters and results from standard data analyses.

Objectives

- To understand the role of Bayesian statistics in clinical research and health-care evaluation.
- To introduce computational tools for Bayesian analysis.
- To highlight challenges and dangers of naïve use of Bayesian methods.
- To provide the basis for a unified statistical approach that allows approaching problems of analysis and design in a structured way.

Dates

Wed 3 – Fri 5 July 2019

Eligibility

Open to PhD students of SSPH+ Public Health Program; other students and external participants are also welcome.

SSPH+PhD Program:

Program Coordination Ann Walser

Academic Lead Prof. Matthias Egger
Prof. Thomas Abel

Contact:

Address

ISPM Bern
Mittelstrasse 43, CH-3012 Bern

Telephone

+41 31 631 58 94

Email

Course Structure

The course consists of a mixture of lectures and computer practicals.

Wednesday

- Introduction to Bayesian methods: basic principles, probabilities
- Inference for binary data and making predictions for binary data
- Computer practicals:
 - on handling probabilities and Bayesian inference for binary data
 - on predictions on number of successes in additional N patients

Thursday

- Bayesian Inference for Normal Data
- Introduction to simulation-based Bayesian analysis (Markov Chain Monte Carlo algorithms) and running Generalized Linear Models (GLM) in JAGS
- Computer practicals:
 - on the analysis of normal data and running JAGS
 - on estimating prevalence, sensitivity, specificity in situations in which two different diagnostic tests are used and no gold-standard is available (in JAGS)

Friday

- Bayesian approaches to evidence synthesis and meta-analysis and how to quantify the amount of historical information
- Issues when incorporating prior information
- Computer practicals on quantifying historical information
- Question and answer session, and feedback on the course

Students will bring their own portable computers. Prior to the course, we will provide instructions regarding the installation of the software packages that will be used in the course. These are R (<http://www.r-project.org/>) and JAGS (<http://mcmc-jags.sourceforge.net/>) which are both freeware. JAGS (Just Another Gibbs Sampler) is a cross-platform engine for the BUGS language with distributions for Mac OS X, Windows, and Linux.

Assessment

Exam deliveries defined on the last day.

Credits	<p>1 ECTS</p> <p>Preliminary Work: 3 h (installing software), Contact: 22 h, Wrap-up Work: 3 h</p> <p>(1 ECTS corresponds to appr. 26-30 hours' work)</p>										
Facilitators	<p>Prof. Marcel Zwahlen, PhD, Institute of Social and Preventive Medicine (ISPM), University of Bern</p> <p>Simon Wandel, PhD, Expert Statistical Methodologist, Novartis Pharma AG, Basel</p>										
Location	<p>ISPM Bern, Mittelstrasse 43, 3012 Bern, Room: 320</p>										
Course Fees	<table border="0"> <tr> <td>SSPH+ PhD Students</td> <td>30.- CHF (Processing fee)</td> </tr> <tr> <td>PPHS PhD Students</td> <td>30.- CHF (Processing fee)</td> </tr> <tr> <td>External MD/PhD Students</td> <td>300.- CHF</td> </tr> <tr> <td>External Academics</td> <td>850.- CHF</td> </tr> <tr> <td>Other Participants</td> <td>1250.- CHF</td> </tr> </table> <p>(The cost scheme depends on the Number of ECTS. Per ECTS participants are asked to pay 300,- CHF, 850,- CHF or 1250,-CHF, respectively)</p>	SSPH+ PhD Students	30.- CHF (Processing fee)	PPHS PhD Students	30.- CHF (Processing fee)	External MD/PhD Students	300.- CHF	External Academics	850.- CHF	Other Participants	1250.- CHF
SSPH+ PhD Students	30.- CHF (Processing fee)										
PPHS PhD Students	30.- CHF (Processing fee)										
External MD/PhD Students	300.- CHF										
External Academics	850.- CHF										
Other Participants	1250.- CHF										
Registration	<p>Please register online on our homepage</p>										
Deadline	<p>3 June 2019</p>										
Max. Attendance	<p>18</p> <p>(preference is given to SSPH+ PhD Students)</p>
