

GIS for Public Health

Description

The physical and social environment that surrounds us plays an important part in our health and wellbeing. The geography concept of 'place' thus cannot be ignored in public health. Whether investigating the level of environmental pollution, access to recreation or health services, or the patterns or spread of disease, Geographic Information Systems (GIS) provide the standard platform for exploring spatial attributes and relationships between our environment and health.

This course offers an introduction to GIS and how it is used in public health and epidemiological research. It will introduce students to the basics including: working with and integrating spatial and non-spatial data; geographic scale and spatial precision; projections; geocoding; visualisation; thematic mapping; and understanding spatial relationships. Specific skills and tools will also be introduced in relation to methods for route analysis and for spatial linkage of exposure, contextual and confounder information for epidemiological or health risk assessment studies. Students will apply their new skills in a case study based either on their own data or on available datasets for defined topics.

This course will be a mix of lectures, demonstrations and practical time for hands-on data analysis in ArcGIS and QGIS.

No prior knowledge of GIS is required, though completion of pre-course work is essential preparation for this intensive course.

Objectives

Students will gain knowledge in the fundamentals of GIS for spatial data handling and analysis. By the end of the course, students will

- Understand how GIS can be used to enhance public health and research;
- Be able to acquire, add, manipulate, visualise and map spatial data in a GIS; and
- Be able to perform basic spatial analyses in ArcGIS and QGIS.

Dates

4 - 8 November 2019 (Mon – Fri)

Eligibility

Open to PhD students of SSPH+ public health program; other students and external participants are welcome to apply for limited spaces.

SSPH+PhD Program:

Program Coordination Ann Walser

Academic Lead Prof. Matthias Egger
Prof. Thomas Abel

Course Structure	5-days hands on experience with ArcGIS interspersed with lectures. The course includes pre-course and homework assignments, and will culminate in group presentations on practical case studies.										
Assessment	Final group presentation										
Credits	2 ECTS Preparation/homework: 8 h, Contact: 45 h (1 ECTS corresponds to appr. 25-30 hrs workload)										
Facilitators	Dr. Danielle Vienneau and Dr. Kees de Hoogh Department of Epidemiology and Public Health, SwissTPH, University of Basel										
Teaching Team	Additionally includes Dr. Marloes Eeftens, Dr. Stefan Dongus and Benjamin Flückiger										
Location	University of Basel, room tba										
Course Fees	<table border="0"> <tr> <td>SSPH+ PhD Students</td> <td>30.- CHF (processing fee)</td> </tr> <tr> <td>PPHS PhD Students</td> <td>30.- CHF (processing fee)</td> </tr> <tr> <td>External MD/PhD Students</td> <td>600.- CHF</td> </tr> <tr> <td>External Academics</td> <td>1700. - CHF</td> </tr> <tr> <td>Other Participants</td> <td>2500. - CHF</td> </tr> </table> <p>(The cost scheme depends on the Number of ECTS. Per ECTS participants are asked to pay 300,- CHF, 850,- CHF or 1250,-CHF, respectively)</p>	SSPH+ PhD Students	30.- CHF (processing fee)	PPHS PhD Students	30.- CHF (processing fee)	External MD/PhD Students	600.- CHF	External Academics	1700. - CHF	Other Participants	2500. - CHF
SSPH+ PhD Students	30.- CHF (processing fee)										
PPHS PhD Students	30.- CHF (processing fee)										
External MD/PhD Students	600.- CHF										
External Academics	1700. - CHF										
Other Participants	2500. - CHF										
Registration	Please register online on our website										
Deadline	4 October 2019										
Max. Attendance	22 (preference is given to SSPH+ PhD Students)
